

FINANCIAL AND COMMERCIAL.

THURSDAY, MAY 14—A. P. M.

The gold market has been quiet and strong to-day, and the extreme range was from 133 1/2 to 140 1/2. There was a moderate demand for gold, and the market was active. The gold clearing amounted to \$36,000,000, the gold balances to \$60,000,000 and the currency balances to \$1,300,000,000. The steamers New York for Bremen took \$1,300,000, in specie, and the Morris Canal for Havana \$130,000, making the export thus far in the week more than \$1,400,000. The Rising Star, from Aspinwall, brought \$1,120,000 in treasure and the government sold about \$300,000 in coin. The disbursements in payment of the May interest on the public debt and the customs receipts have been nearly equal in amount during the last few days. The payments yesterday aggregated \$400,000 and on Tuesday \$400,000. The customs receipts in this city for the ten months ending on April 30 were, according to the official returns, \$92,730,312, against \$100,000,000 for the corresponding period in the previous year, and \$111,447,128 for that in 1865-6. For the six months ending with December, 1867, the receipts were \$54,731,801. In January they were a little more than seven millions; in February, nine millions and a half; in March, eleven millions, and in April ten millions. The disposition of most of the gold speculators during the forenoon was to discount the removal of the President, but afterwards speculation in this direction languished, and options were very much divided as to the probable results of the great State trial.

The money market continues to gradually grow easier, and loans are now made freely at six per cent, seven being an entirely exceptional rate. The banks are still in receipt of currency from the country, and the demand for loans and discounts is not sufficient to absorb the supply of bankable funds. The Treasury purchased about \$600,000 of seven-thirty notes during the day, and to-morrow the May compound interest notes mature to the amount of about twenty-four millions. The Assistant Treasurer will pay the principal and interest of these as they are held by the banks in three per cent certificates, and they will be the gainers thereby in point of return to the extent of the accrued interest.

The stock market has been variable. During the forenoon it was very firm and prices improved, Erie selling at 10 1/2 a 10 3/4, but afterwards there were free sellers at the advance and the tendency was downward until late in the afternoon, when it became steady. There was some pressure to sell Fort Wayne by investment holders, but the clique bid the price up about one per cent for speculative effort in the face of it. Stockholders are beginning to understand that a stock upon which ten per cent dividends are paid out of the proceeds of sales of new stock is little better than a fraud upon the public, and that such a policy, if persevered in, will ultimately leave the stock holder a hopeless dividend. Late in the day it was rumored that the Pennsylvania Central Company had been authorized to issue \$1,000,000 of new stock, and that the Erie, Columbus and Cincinnati road, extending from Pittsburgh to Columbus, and from Columbus over the Columbus, Chicago and Indiana Railway to Chicago, thus making a short, direct route from New York and Philadelphia, via Pittsburgh, to Chicago. There was a large business transacted in government securities during the early part of the day, and prices advanced 1/4 a 1/2 per cent, but subsequently the market became dull, although it remained steady. Its undertone is very firm, and it only awaits the settlement of the impeachment question in order to experience material improvement. The Assistant Treasurer continues to purchase seven-thirty notes to a much larger amount than he sells gold, and in this way the currency balance in the Sub-Treasury is being gradually reduced, while the supply of loans in Wall street is correspondingly increased. The tendency towards lower rates for money is an important element in estimating the course of United States stocks, and already balances are left with the leading dealers in some instances at five per cent. As the close the market was firm at the following quotations:—Registered, 1881, 113 1/2 a 113 3/4; coupon, 1881, 113 1/2 a 114; 5-20's, registered, 1882, 106 1/2 a 106 3/4; 6-20's, coupon, 1882, 106 1/2 a 106 3/4;
